

## Day-2 : Assignment

Q.1) Write a java program which would take two values through command line argument & print sum of the two values.

→

```
public class Addition {  
    {  
        public static void main (String arg[])  
        {  
            System.out.println (" Example of command  
                                line argument ");  
            int x , y , sum ;  
            System.out.println (" Enter first value = " );  
            x = Integer.parseInt ( arg [0] );  
            System.out.println (" Enter second value = " );  
            y = Integer.parseInt ( arg [1] );  
            sum = x + y ;  
            System.out.println (" Sum of x & y  
                                is = " + sum );  
        }  
    }  
}
```
